High school diploma

WORK EXPERIENCE

Cuatro Networks
August/2022 – Present **- Fullstack developer**

Experience developing a stock market, adding validations for the user's input, developed +100 user interfaces with React and bootstrap 5. Use of AWS cognito for user authentication. Use of figma to make some layouts and screen flows.

Professional use of react hooks (useState, useEffect, useContext, etc.) as well conditional rendering.

Writing code with best practices, following the requirements of the system. Experience getting the requirements of the system from the clients, stakeholders and writing them.
Experience working on a week long sprints under the crystal clear methodology.

Google Cloud Platform Skills
Creation of VMs and instance groups, clusters in Kubernetes, Docker (Containers and Registry, use of Cloud Build), Deploy applications with Cloud Run and App Engine and splitting traffic across different versions of an application.

Current project **– CEHVAL** (In progress)

Development of the Honduran securities settlement center. Working hand to hand on a six people team. In this project I'm focus on the frontend using javascript and frameworks such as react and bootstrap 5. Did the design of the application and working everyday connecting the backend APIs builded in Java with the frontend.
